

Dodgeball Net Game

This is a throwing game which involves throwing dodge balls into an opponents hockey nets.

Equipment used is 6 hockey nets and lots of gator skin balls. Split the class into 2 teams.

Put 3 nets along each end line of a basketball/volleyball court. The students are lined up on their side of half. On the command “go” students throw the gator skin ball into the opponents’ nets. If a goal is scored, the nets are turned around and students need to throw at the other nets which have not been scored on. The game is over when all the nets are turned around on any of the teams.

There is no goalie in front of the nets, but you could add one if you wanted to as a progression on the theme that you are working on(handball).
